W/m²K

**Main
advantages:**

protection of natural resources –
the core of the profiles is made
of recycled material

the system is adapted to
the construction of windows, entrance
doors and balcony doors

straight contours from the outside
and inside of the window

high stability due to optimal steel
reinforcements

can be used in newly built and
renovated buildings

a wide range of veneers – including
smooth and matt ones

possibility of finishing with exclusive,
wood-like RealWood® veneers
